

KARUN RAYAMAJHI

Frontend & DevOps Engineer

rayamajhikarun@gmail.com | +977 9864476794 | Lalitpur, Lubhu, Kathmandu | github.com/echokarun | linkedin.com/in/karun-rayamajhi-b0293932a

SUMMARY

Frontend Developer with hands-on experience building and deploying production-grade web and mobile applications. Proficient in React, TypeScript, Next.js, and React Native, with practical DevOps experience spanning Docker, Nginx, CI/CD pipelines, Cloudflare DNS, and self-hosted VPS infrastructure. Comfortable working across the full delivery lifecycle — from pixel-perfect UI implementation to cloud deployment and server monitoring. Actively expanding into full stack engineering with Express.js and backend architecture.

EXPERIENCE

Software Engineer — Frontend & DevOps

Feb 2024 – Apr 2025

Chautari Digital · Satdobato, Lalitpur · 1 yr 3 mos

- Developed web and mobile frontends using **React**, **Next.js**, **TypeScript**, and **React Native** across multiple production projects, adhering to pixel-perfect Figma designs and maintaining clean, scalable file/folder structures.
- Contributed to **LMKZ (Link My Kidz)**, a multi-tenant child management platform — built frontend screens for daily insights (attendance, meals, mood, checkout), ECD tracking, and AI-powered child sentiment analysis; integrated with NestJS backend and AWS S3 media storage.
- Researched and evaluated React Native architecture for LMKZ, recommending adoption of **TanStack Query**, **NativeWind**, and **Biome**; worked on push notifications and contributed to app deployment pipeline setup.
- Contributed to **Project Brain**, an internal AI platform powered by the **Claude API** and **Claude Code** — implemented API workshop endpoints, delta verification UI (cross-checking PO vision against backend endpoints), and AI-generated design prompts; collaborated on bug fixes, production issue resolution, and team coordination via **Kanban** methodology.
- Authored and maintained CI/CD deployment pipelines via **GitHub Actions** for Project Brain, Chautari Digital's main site, and Blurkart.
- Built and deployed a full-stack Next.js application (**blurkart.com**) on a NepalCloud VPS with Nginx reverse proxy, **Docker** containerization, and **PostgreSQL** in production; performed full VPS migration including PostgreSQL database export, media file transfer, and Docker environment cleanup.
- Monitored server logs and managed VPS infrastructure health across client deployments.
- Mitigated the **React2Shell vulnerability (CVE-2025-55182)** — assessed exposure across all company projects and implemented necessary safeguards for production applications.
- Managed **Cloudflare DNS** configuration and led domain recovery and escalation procedures for production domains.

EDUCATION

Bachelor of Computer Applications (BCA) — Software Development

2024 – 2028 (Expected)

VS International College, New Baneshwor, Kathmandu · Currently: 4th Semester

+2 Science (Higher Secondary)

Completed 2024

Everest College, Thapathali, Kathmandu

SKILLS

Frontend

HTML, CSS, JavaScript, TypeScript, React, Next.js, React Native, Expo, NativeWind, TailwindCSS, ShadCN

Mobile	React Native, Expo, NativeWind, Animatable, TanStack Query, Zustand, Push Notifications
DevOps & Infra	Docker, Nginx, CI/CD, GitHub Actions, Linux VPS, Cloudflare DNS, NepalCloud, Server Log Monitoring
Backend / DB	PostgreSQL, PocketBase, REST APIs, NestJS (integration), Appwrite, Plaid, Dwolla
Auth & Payments	Clerk, Stripe
Tools	Git, GitHub, VS Code, Figma, Biome, Kanban, Claude API, Claude Code
Learning	Express.js, Backend Architecture, Full Stack Engineering

PROJECTS

LMKZ (Link My Kidz)

NestJS · React · React Native · TypeScript · TanStack Query · NativeWind · Biome · AWS S3 · PostgreSQL

Multi-tenant child management platform for Montessori/childcare schools. Features daily insights (attendance, meals, mood, checkout), Early Child Development (ECD) tracking, and AI-powered Child Sentiment Analysis surfacing personality insights for parents. Built web and mobile frontends, contributed to NestJS backend integration and AWS S3 media storage, worked on push notifications, and contributed to app deployment pipeline setup.

Project Brain

React · Next.js · TypeScript · Claude API · Claude Code · Docker · GitHub Actions

Internal AI platform for accelerating development workflows. Product Owners upload requirements; the system uses the Claude API to analyze module architecture, generate per-screen design prompts, and run delta verification — cross-checking PO vision against backend endpoints to surface missing or unused APIs. Contributed frontend engineering, implemented API endpoints, built delta verification UI, collaborated on bug fixes, managed team coordination via Kanban, and set up CI/CD pipeline via GitHub Actions.

Blurkart

blurkart.com

Next.js 14 · React · TypeScript · TanStack Query · PostgreSQL · Docker · Nginx · GitHub Actions

E-commerce platform for goggles and contact lenses. Inherited and thoroughly read the existing codebase to understand file/folder structure, then customised UI and logic to fit client requirements. Deployed on a NepalCloud VPS with Nginx reverse proxy, Docker containerization, and GitHub Actions CI/CD. Performed full VPS migration including PostgreSQL export, media file transfer, and Docker cleanup.

Horizon

github.com/echokarun/Bank-app

Next.js · TypeScript · Appwrite · Plaid · Dwolla · React Hook Form · Zod · TailwindCSS · Chart.js · ShadCN

Financial SaaS platform connecting to multiple bank accounts with real-time transaction display, peer-to-peer money transfers, and personal finance management. Strong emphasis on type safety (TypeScript + Zod) and modern UI patterns (ShadCN + TailwindCSS).

Ryde

github.com/echokarun/Ryde

React Native · Expo · Clerk · NeonDB · Zustand · Google Maps API · Stripe

Mobile ride-booking application similar to Uber. Features email authentication (Clerk), real-time location and map integration (Google Maps API), Stripe payment processing, NeonDB-backed API routes, and Zustand state management. Users can search, confirm, and manage rides.

Aora

github.com/echokarun/Aora

React Native · Expo · NativeWind · Animatable · Appwrite

Mobile video-sharing platform for AI-generated content. Features a trending videos feed, upload functionality, and fluid animations via Animatable. Backend managed with Appwrite for authentication and file storage.

JobFinder

github.com/echokarun/Job-finder

React Native · Expo · Axios · REST API (RapidAPI)

Mobile application displaying current job listings via RapidAPI. Built as a React Native learning project with Expo, focusing on API integration with Axios, list rendering, and navigation patterns.

AWARDS

Company Hackathon — 1st Place

November 2025

Chautari Digital · Led team collaboration to build and ship features under time pressure, taking first place among competing teams.

LANGUAGES

Nepali — Native **Hindi** — Fluent **English** — Conversational
